INTENT TO SOLE SOURCE

The South Carolina Department of Health & Environmental Control (DHEC) is seeking qualified vendors to provide a 7700x Agilent Technologies Liquid Chromatography – Inductively Coupled Plasma – Mass Spectrometer (LC-ICP-MS) trace element analyzer system, & related support & training or equivalent hardware, software & support. Equivalent systems offered must have the following critical elements & features:

- ICP / MS
- PC with Monitor & Printer & software
- Autosampler
- Heat Exchanger
- Integrated HPLC
- High solids interface able to perform direct analysis of 1% solids or greater without dilution. Many of our samples have high levels of dissolved solids. When these samples are encountered they must be diluted & re-analyzed. The ability to perform direct analysis of samples with 1% dissolved solids eliminates the need for dilution & re-analysis.
- The system must be upgradable to triple quad (MS/MS) configuration through instrument exchange. The triple quad should be equipped with a scanning, unit mass resolution quadrupole placed before the collision/reaction cell to control the ions that enter & react in the cell.
